

Monthly Indicators

December 2019

In 2019 home prices were up again in most markets. Buyer demand continues to be strong but with tepid seller activity still in many locations, total sales are lower than they would normally be in a more balanced market. While up from their recent lows a few months ago, mortgage rates end the year close to three-quarters of a percent lower than a year ago, helping to improve affordability and offset rising home prices.

New Listings decreased 5.7 percent for Single Family and 6.5 percent for Townhouse/Condo. Pending Sales increased 21.4 percent for Single Family and 34.6 percent for Townhouse/Condo. Inventory decreased 27.0 percent for Single Family and 21.1 percent for Townhouse/Condo.

Median Sales Price increased 12.3 percent to \$252,750 for Single Family and 18.4 percent to \$166,000 for Townhouse/Condo. Days on Market decreased 13.6 percent for Single Family but increased 3.2 percent for Townhouse/Condo. Months Supply of Inventory decreased 30.8 percent for Single Family and 22.2 percent for Townhouse/Condo.

With low mortgage rates, low unemployment, and continued wage growth, home buyer activity is expected to remain healthy into the new year. New construction has been on the rise in 2019 and is expected to continue into 2020, but many experts note that the country is still not building enough new units to quench demand. It remains to be seen whether existing homeowners will be enticed to sell by higher home prices, which could finally bring the overall housing market into greater balance.

Housing Affordability Index

This index measures housing affordability for the region. For example, an index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.
